SUMMARY

Frontend engineer with 5+ years building web, mobile and desktop products with React, React Native, Next.js, Flutter and Vue.js. I turn complex product requirements into clear, responsive interfaces, and I ship my own tools: an offline voice-note transcriber, a local-first router manager and an open-source CMS.

EXPERIENCE

Waysdrop — *Frontend Developer*
May 2025 – Jun 2026
Built the web side of an on-demand delivery platform connecting individuals, stores and couriers: the customer web app, admin, agent and support dashboards, chat and the landing page.

Envision IT — *Mobile Developer*
Dec 2024 – Nov 2025
Built cross-platform mobile applications using React Native and Flutter, delivering smooth, responsive interfaces for both Android and iOS. Integrated RESTful APIs, handled state management, and implemented navigation and authentication flows.

The Gigs, Remote — *Frontend Developer*
May 2024 – Jan 2025
Developed responsive web applications using Vue.js. Built reusable components, managed state with Vuex, integrated RESTful APIs, and optimised performance across browsers.

Hynitr, Remote — *Frontend Developer*
Feb 2024 – Mar 2024
Built scalable web applications using React and Next.js, with server-side rendering, API integration and state management, in TypeScript and Tailwind CSS.
